

How To Draw A Simple Site Plan

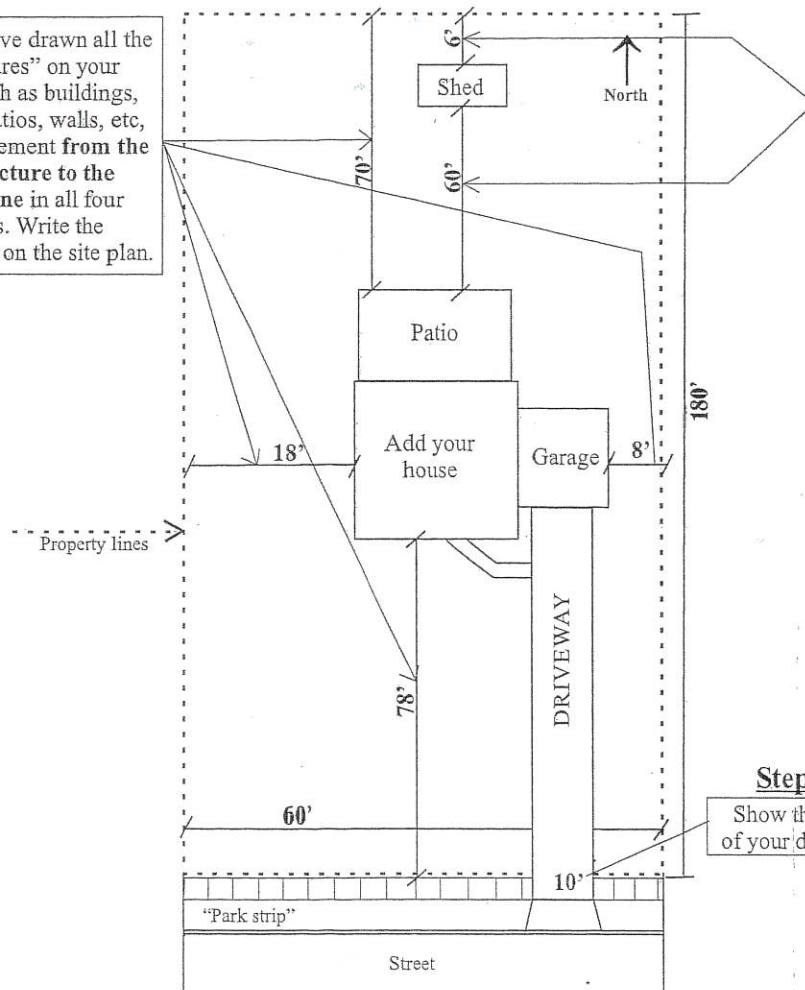

Step 1: Draw the basic shape of your property (the lot your house is on):

Step 2: Draw all the permanent structures.....

Step 3:

After you have drawn all the "hard features" on your property, such as buildings, driveways, patios, walls, etc, take a measurement from the main structure to the property line in all four directions. Write the measurements on the site plan.

Step 4:

Take measurements from the main structure to any outbuildings, and from those outbuildings to the property line. Write these on the site plan.

Step 5:

Show the width of your driveway

Note* This is a sample of an imaginary property. You cannot use it for *your* property. Use it only as a *guide* to draw your own. Your drawing does not need to be done on a computer...it can be drawn with pencil and paper.
